

Connectivity - the Next Generation Infrastructure

Eeyou Communications Network

A telecom transport network providing efficient access to global communications for:

- Telehealth
- Distance education and remote learning
- Public safety and security
- Community multimedia applications
- e-Government and commercial services
- Virtual Private Networks
- Internet high-speed access
- Broadband transport for telecom service providers
- Connectivity to multiple public-service networks (RISQ, RTSS)

Eeyou Communications Network (ECN) is a non-profit telecommunications corporation that provides broadband connectivity for the Cree communities of Eeyou Istchee and municipalities of the James Bay region.

Eeyou Communications Network infrastructures use modern optical fibre and Internet Protocol (IP) technologies to deliver advanced and reliable carrier grade services for connectivity to global telecom networks and the Internet highway.
